

# Area Management

## GuardPoint 10 Module

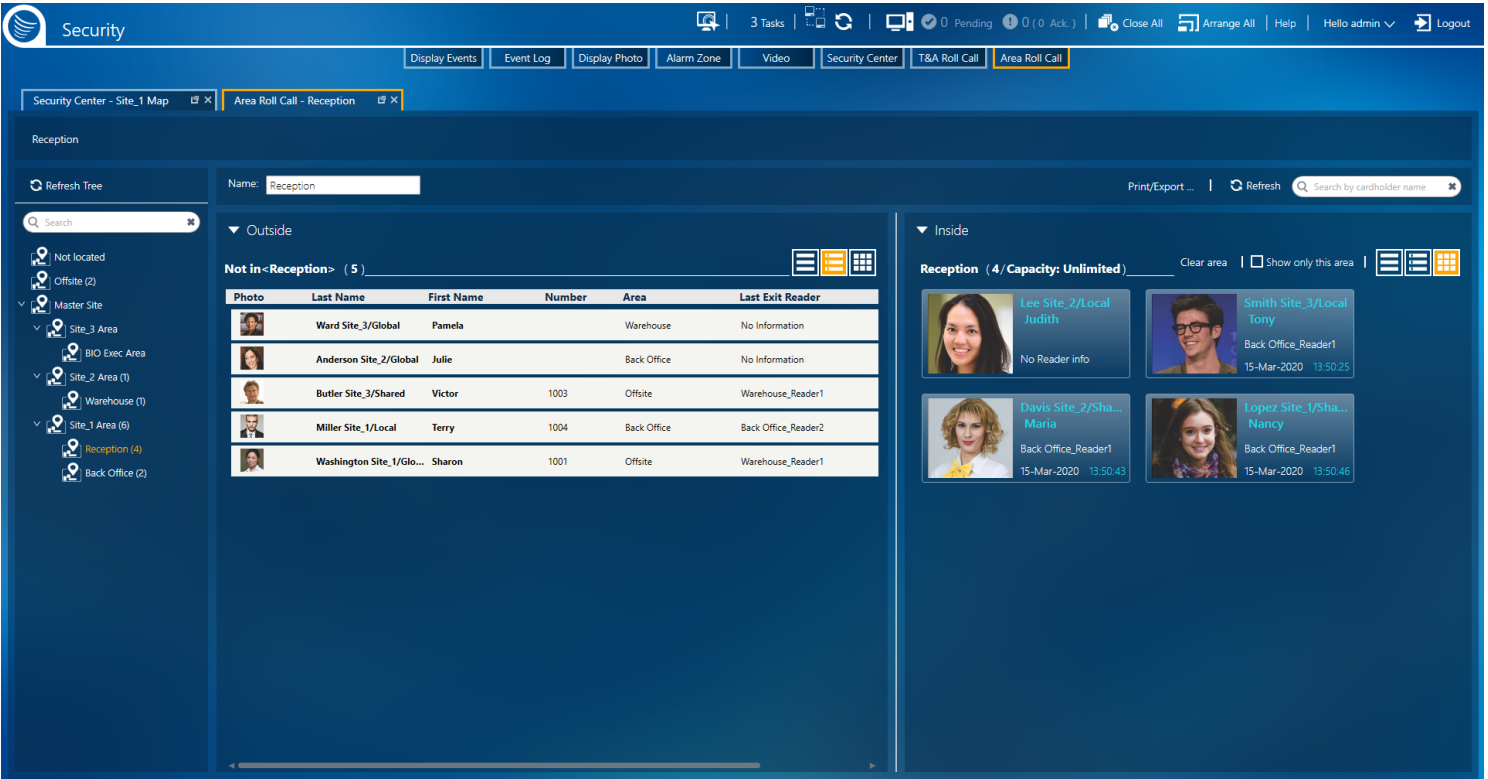

GuardPoint 10 has a highly configurable Area Management module, where spaces (buildings, rooms, etc.) can be defined as named areas for monitoring cardholder occupancy. This allows GuardPoint 10 to implement tracking of cardholders within the access-controlled environment.

The capacity of the area can be set for each area, which in turn can trigger a chosen action when the capacity is reached; For instance, keep the doors closed, send an email, and start an alarm.

In addition, the module can display the real time movements of Cardholders, allowing the user to keep track of everyone.

Reports can also be generated and printed out on the fly, either by the user or as an action, triggered by an alarm. For example, generate a rollcall report at the end of each day.

Find more information about GuardPoint 10 at [www.sensoraccess.zendesk.com](http://www.sensoraccess.zendesk.com)

The screenshot displays the 'Security Center' interface with the 'Area Roll Call' module selected. The interface shows a list of areas on the left sidebar, including 'Reception (4)'. The main area displays a table of cardholders currently in the 'Reception' area.

Photo	Last Name	First Name	Number	Area	Last Exit Reader
	Ward Site_3/Global	Pamela		Warehouse	No Information
	Anderson Site_2/Global	Julie		Back Office	No Information
	Butler Site_3/Shared	Victor	1003	Offsite	Warehouse_Reader1
	Miller Site_1/Local	Terry	1004	Back Office	Back Office_Reader2
	Washington Site_1/Glo...	Sharon	1001	Offsite	Warehouse_Reader1

On the right side of the interface, there is a section titled 'Inside' showing a list of cardholders currently in the 'Reception' area, including Lee Site\_2/Local Judith, Smith Site\_3/Local Tony, Davis Site\_2/Sha... Maria, and Lopez Site\_1/Sha... Nancy.
