Case Study

Sport & Leisure Industry

Client : **Olympic Games 2008, Beijing**
Type of System : **GuardPoint PRO integrated Access Control Solution**
Type of Site : **Stadium**
System Description : **High Security, Public Safety, International Terrorist Threat**

Olympic Sport Centre Stadium and Olympic Sport Centre Gymnasium

The Stadium will be used for Handball Preliminary and Quarter Final during 2008 Olympic Game in Beijing. It is also the training ground for some Special Olympic sports – blind man gateball, wheelchair basketball, wheelchair fencing, and wheelchair Rugby. The newly built Gymnasium will be used for Track Cycling races. The Alarm Monitoring module of GuardPoint Pro Access Control System is used extensively.

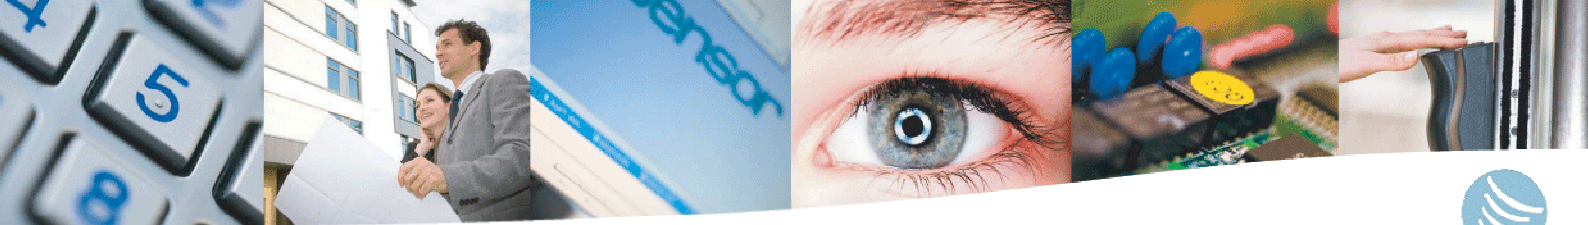

Sport Centre Gymnasium

In this case, GuardPoint Pro Access Control System has managed a total of 120 passages; mainly controlling the floor passages and important office passages, areas for matches, and important and sensitive generator rooms. Multiple workstations, Alarm Monitoring tools, Guard Patrol module, Time and Attendance, and OPC integration tools were all utilised at this site.

Beijing Institute of Technology Gymnasium

Used primarily for Volleyball during the 2008 Beijing Olympic, and for the blind man gateball matches for the Special Olympic as well. GuardPoint Pro, Access Control System manages nearly 80 passages, controlling the Athlete changing areas and Rest Rooms and important offices. The Alarm Monitoring module, CCTV module, OPC module are all employed on this site.
